

CAMPSITE APPLICATION

This document outlines the general guidelines for camping on your Campbell Global recreational lease. Please review all information prior to submitting your

CampbellGlobal
FOREST & NATURAL RESOURCE INVESTMENTS

The purpose of this document is to establish clear and consistent policies for camping on your Campbell Global recreational lease. Campbell Global reserves the right to amend these policies at any time.

***Standard Campsite Rate: \$100/campsite | Standard Structure Rate: \$100/structure**

- ◇ Camping is not permitted on every Campbell Global property. When it is permitted, camping is limited to designated sites.
- ◇ You must have written permission for a campsite and any campsite improvement (e.g., utilities).
- ◇ All campsite structures must be capable of being moved on demand (i.e., mounted on skids or wheels). The use of mobile homes as a campsite structure requires written permission.
- ◇ Campsite structures must have the owner's name and day-time phone number clearly posted at the structure's entrance.
- ◇ A "Structure Fee" will be assessed for all campsite structures (e.g., Campers, Trailers, Recreational Vehicles, Portable Buildings, etc.). It is the responsibility of the Lessee to report all campsite structures to Campbell Global.
- ◇ No permanent residence will be permitted at campsites.
- ◇ Campsite grounds must be kept clean and free of litter at all times. Garbage must not be burned or buried. All garbage must be removed from the Property and disposed of properly. Any materials being used for construction or repair at a campsite must be neatly stored. Junk or unserviceable equipment of any kind, including scrap lumber or metal, must be removed from property. Any structures not in use must be removed.
- ◇ No chemicals of any kind will be stored at the campsite, except for normal household chemicals in consumer-sized containers which shall be used strictly according to label directions. No petroleum products, except propane, may be stored at the campsite in containers larger than 5 gallons. Petroleum containers must be OSHA approved (spill proof). Any spills that are reportable to any government entity under applicable law must first be reported to the applicable authorities and then to Campbell Global.
- ◇ Septic systems must comply with applicable state and local laws and regulations. Contents of holding tanks and portable toilets must be removed from the Property and disposed of properly. Sewage will not be allowed to drain onto the surface of the ground. No effluent of any type will be allowed to run into any natural drains or water bodies.

*The standard campsite rate is \$100/campsite with the exception of leases on the CC Tree Farm in Florida, which are charged a rate of \$400.

To apply for a campsite, please complete the form below. ALL information is required.

Lease (RLU) Number: _____
